## Introduction

Since our founding in 2003, the mission of the Office for Education Policy has been looking at pressing issues through the lens of academic research and disseminating our findings to educators, policymakers, and other stakeholders around Arkansas. Every once in a while, however, we think it is okay to stray from issue analysis and simply share some good news!

In this Arkansas Education Report (AER), we aim to highlight excellent performance and offer our congratulations. To that end, we are happy to highlight many excellent schools around the state in our now-annual AER, entitled the Outstanding Educational Performance Awards, or the OEP awards.

Over a three month period this fall, a new set of OEP Awards will be released every couple of weeks to highlight high-performing schools in Arkansas on the Benchmark exam in math and literacy, and End-Of-Course (EOC) exams in Algebra, Geometry, Literacy (Grade 11), and Biology.

Two years ago, we first introduced an academic performance indicator, the "GPA" rating system, to rank the highest-performing schools. In the past, the rankings were created based on the percentage of students scoring at the proficient or advanced level on each assessment. Generally, when discussing academic achievement on the Benchmark exams, policymakers focus on this figure. However, the proficiency indicator suffers from being an "all-or-nothing" measure, in which a student is either proficient or not.

The proficiency measure disregards real information provided by student scores that are placed into the four different performance categories: below basic, basic, proficient, and advanced. Additionally, this mark does not differentiate between a school in which $100 \%$ of students score proficient and a school in which $100 \%$ of students score advanced. Both of these schools would show $100 \%$ of students performing at proficient and advanced levels; however, in the latter school, students actually performed at a significantly higher level. Thus, a slightly more informative indicator gives the most credit to students who score at the advanced level and the least credit to students who score at the below basic level. For such purposes, we have created the "GPA" rating system. In this GPA measure, parallel to the familiar grade point average for individual students, we treat the Benchmark test scores in a similar way, whereby a 4.0 is a perfect score.

| Category | GPA Points Awarded |
| :--- | :---: |
| Advanced | 4.0 |
| Proficient | 3.0 |
| Basic | 2.0 |
| Below Basic | 1.0 |

The GPA measure, we believe, is a better representation of student achievement on statewide standardized exams. In this report, we are presenting a list of the top 25 schools in each area. In some cases, these "top 25 lists" will contain more than 25 schools as some schools' GPA scores will be identical. This is not a new phenomenon, as we also exceeded 25 schools in previous
reports when using the percent proficient and advanced metric as an indicator for student achievement; however, there are fewer ties using the more precise GPA measure.

After we present our overall snapshot of high-performing schools, we will release subsequent reports every few weeks focusing on different subsets of schools. In the following weeks, we will focus on high-performing elementary schools, middle schools, and high schools in the various regions across the state. Then, we will feature schools that are beating the odds (that is, schools that have high levels of student achievement while serving a high percentage of lowincome students). Finally, we will conclude our report by focusing on the schools with the greatest improvement in test scores. Our release schedule is:

- High-Achieving "Overall" Schools in Arkansas
- High-Achieving Elementary Schools
- High-Achieving Middle Schools
- High-Achieving High Schools
- Beating the Odds: High-Achieving Schools Serving Low-Income Communities
- Most Improved Schools

Stay tuned over the next ten weeks to see which schools in your area are recognized for our OEP Awards!

## V. 2014 OEP Awards: Beating the Odds - High Achieving SCHOOLS SERVING LOW-INCOME COMMUNITIES

This section highlights high-achieving schools across Arkansas based on Benchmark examinations in Math and Literacy and the End-of-Course (EOC) examinations in Algebra, Geometry, Biology and Grade 11 Literacy from the 2013-14 academic year ${ }^{1}$. For these awards, we consider schools that serve free and reduced lunch to at least $66 \%$ of the student body.

This section is divided into subsections based the four exams. Schools are ranked using the GPA performance measure (explained in the Introduction) in each subject. Because the exams are not "grade-specific," schools in each of the subsections are categorized differently to account for school performance based on grade levels served; this is explained further in the introduction text in each subsection. Furthermore, each subsection includes the top schools, the top "highpoverty" schools, and the top five schools by region ${ }^{2}$. In the subsections, the tables present the high-achieving schools for the noted category and subject using the GPA performance measure. These tables include the region in which the school is located, the number of test takers, the percentage of students scoring at the proficient and advanced levels, and the GPA of the school in that particular subject.

## X. Algebra End-of-Course Exam, 2014

Algebra is generally taken during the ninth grade; however, some students may elect to take this course earlier if they have taken prerequisite classes. Thus, most advanced students take the course and the test in the $7^{\text {th }}$ or $8^{\text {th }}$ grade. Because of the likely academic differences between students who take algebra in the 8th and 9th grades, middle and junior high schools tend to have higher proficiency levels than do schools which serve $9^{\text {th }}$ grade students. Due to these differences, these awards are split into three categories:

- High School (schools that serve $9^{\text {th }}$ grade and above)
- Junior High and Comprehensive High School (schools that serve $8^{\text {th }}$ and $9^{\text {th }}$ grade)
- Middle School (schools that serve $8^{\text {th }}$ grade and below)

For the purposes of this report, all school types (high schools, junior high and comprehensive high schools, middle schools) were considered for the "High-Poverty" ${ }^{3}$ awards and the awards by region.

## Y. Geometry End-of-Course, 2014

Geometry is generally taken during the tenth grade; however, some students may elect to take the course earlier if they have taken prerequisite classes. This typically results in the most advanced students taking the exam in $8^{\text {th }}$ or $9^{\text {th }}$ grade. Because of the likely academic differences between students who take geometry in earlier grades, junior high schools tend to have higher proficiency levels than do schools which serve only $10^{\text {th }}$ grade students. For this reason, schools have been split into two groups:

- High School: primarily $9^{\text {th }}-12^{\text {th }}$ grades (includes Comprehensive High Schools serving $7^{\text {th }}-12^{\text {th }}$ grades)
- Junior High School: primarily $8^{\text {th }}-9^{\text {th }}$ grades (and/or any grades below)

## Z. Biology End-of-Course Exam, 2014

Biology is generally taken during the tenth grade; however, some students may elect to take the course earlier if they have taken prerequisite classes. This typically results in the most advanced students taking the exam in $8^{\text {th }}$ or $9^{\text {th }}$ grade. Because of the likely academic differences between students who take biology in earlier grades, junior high schools tend to have higher proficiency levels than do schools which serve only $10^{\text {th }}$ grade students. For this reason, schools have been split into two groups:

- High School: primarily $9^{\text {th }}-12^{\text {th }}$ grades (includes Comprehensive High Schools serving $7^{\text {th }}-12^{\text {th }}$ grades)
- Junior High School: primarily $8^{\text {th }}-9^{\text {th }}$ grades (and/or any grades below)

Compared to other EOC exams, proficiency rates in biology are significantly lower. The Biology EOC is a much newer test than the others (it was first administered in 2008), and most likely students and schools are still adapting to its requirements. Due to this, relatively lower rates for the schools included in this section come as no surprise.

## Appendix

## A. Methods

The Office for Education Policy strives to make all of our calculations and publications transparent to our readers. Thus, in this appendix we describe our data source, calculations performed on these data for the purposes of our reporting, and our method for determining a school's classification as an elementary, middle, or high school.

All data used in this report were obtained from the Arkansas Department of Education. Benchmark and End-of-Course exam scores were obtained from the testing section (http://www.arkansased.org/divisions/learning-services/student-assessment). Other data, such as the percent of students eligible for free and reduced lunch, were obtained from the Arkansas Department of Education Data Center (http://adedata.arkansas.gov).

All data were analyzed at the school level; however, the ADE provides the percentage of scores at the proficient and advanced level by grade. Therefore, in order to present an accurate school level percentage of students scoring proficient and advanced across all grades, a weighted average for each school was calculated to account for different levels of enrollment at each grade level. In an effort to highlight schools that were strong in both subject areas, we calculated a simple average of the school level percent proficient and advanced in math and literacy at the elementary and middle school levels.

As previously discussed in the introduction, in order to calculate the GPA measure we treat the benchmark test scores similar to the existing grade point system.

| Category | GPA Points <br> Awarded |
| :--- | :---: |
| Advanced | 4.0 |
| Proficient | 3.0 |
| Basic | 2.0 |
| Below Basic | 1.0 |

We calculated the GPA measure for every schools math, literacy, and combined math and literacy scores. The GPA measure is comprehensive in that it takes into account all of the test score levels (advanced, proficient, basic, and below basic), instead of lumping together advanced and proficient scores.

## B. School Classification

For the OEP Awards, we classified schools based on the following rules:

- Elementary School: primarily grades 3-5 (minimum grade P, K, 1, 2, 3, or 4)
- Middle School: primarily grades 6-8 (minimum grade of 4,5 , or 6 and maximum grade of 7,8 , or 9 )

There were also a few "comprehensive schools," such as K-8 or K-12 schools, that we included as either middle schools or elementary schools based on their enrollment numbers. The following table lists every grade configuration and their classifications.

Table A: School Classifications

| Elementary Schools | Middle Schools |
| :---: | :---: |
| 1-4 | 4-6 |
| 1-5 | 4-8 |
| 1-6 | 5-6 |
| 1-8 | 5-7 |
| 2-3 | 5-8 |
| 2-4 | 5-9 |
| 2-5 | 5-12 |
| 2-6 | 6 |
| 3-4 | 6-12 |
| 3-5 | 6-7 |
| 3-6 | 6-8 |
| 4-5 | 7-12 |
| 5 | 7-8 |
| K-3 | 7-9 |
| K-4 | 8 |
| K-5 | 8-9 |
| K-6 | K-12 |
| K-7 | 8-12 |
| K-8 |  |
| P-2 |  |
| P-3 |  |
| P-4 |  |
| P-5 |  |
| P-6 |  |
| P-7 |  |
| P-8 |  |

## C. School Classification - High School Awards

For the OEP High School Awards, we primarily classified schools based on the following rules:

- Junior High: primarily grades 7 - 9 (maximum grade of 9 )
- High School: primarily grades 9 - 12

For the Algebra EOC, schools are classified differently, as the test is taken at different levels. These classifications are explained in the Algebra EOC section.

Table B: School Classifications

| Junior High |  |
| :---: | :---: |
| $5-7$ | High School |
| $5-8$ | $8-12$ |
| $6-7$ |  |
| $6-8$ | $10-12$ |
| $7-8$ |  |
| $7-9$ |  |
| 8 |  |
| $8-9$ | $9-112$ |
| $4-8$ |  |
| $1-8$ |  |
| K-8 |  |

[^0]:    ${ }^{1}$ The Algebra, Biology, and Geometry EOC exams are given twice annually: in January and again in April. The Grade 11 Literacy Exam is administered in March.
    ${ }^{2}$ Schools are divided into five regions in Arkansas: Northwest (NW), Northeast (NE), Central (CN), Southwest (SW), and Southeast (SE).

[^1]:    3 "High-Poverty" schools have $66 \%$ or more students receiving a free or reduced lunch (FRL) in the grades they serve.

[^2]:    ${ }^{5}$ A school was designated a Junior High School or Comprehensive High School if it serves students in $8^{\text {th }}$ and $9^{\text {th }}$ grades.

[^3]:    ${ }^{7}$ A school was designated $8^{\text {th }}$ and $9^{\text {th }}$ Grade Junior High School if it served students in grades 8 and 9 .

[^4]:    11 "High-Poverty" schools have $66 \%$ or more students receiving free or reduced lunch (FRL) in the grades they serve.
