## INTRODUCTION

Since our founding in 2003, the mission of the Office for Education Policy has been looking at pressing issues through the lens of academic research and disseminating our findings to educators, policymakers, and other stakeholders around Arkansas. Every once in a while, however, we think it is okay to stray from issue analysis and simply share some good news!

In this Arkansas Education Report (AER), we aim to highlight excellent performance and offer our congratulations. To that end, we are happy to highlight many excellent schools around the state in our now-annual AER, entitled the Outstanding Educational Performance Awards, or the OEP awards.

Over a three month period this fall, a new set of OEP Awards will be released every couple of weeks to highlight high-performing schools in Arkansas on the Benchmark exam in math and literacy, and End-Of-Course (EOC) exams in Algebra, Geometry, Literacy (Grade 11), and Biology.

Two years ago, we first introduced an academic performance indicator, the "GPA" rating system, to rank the highest-performing schools. In the past, the rankings were created based on the percentage of students scoring at the proficient or advanced level on each assessment. Generally, when discussing academic achievement on the Benchmark exams, policymakers focus on this figure. However, the proficiency indicator suffers from being an "all-or-nothing" measure, in which a student is either proficient or not.

The proficiency measure disregards real information provided by student scores that are placed into the four different performance categories: below basic, basic, proficient, and advanced. Additionally, this mark does not differentiate between a school in which $100 \%$ of students score proficient and a school in which $100 \%$ of students score advanced. Both of these schools would show $100 \%$ of students performing at proficient and advanced levels; however, in the latter school, students actually performed at a significantly higher level. Thus, a slightly more informative indicator gives the most credit to students who score at the advanced level and the least credit to students who score at the below basic level. For such purposes, we have created the "GPA" rating system. In this GPA measure, parallel to the familiar grade point average for individual students, we treat the Benchmark test scores in a similar way, whereby a 4.0 is a perfect score.

| Category | GPA Points Awarded |
| :--- | :---: |
| Advanced | 4.0 |
| Proficient | 3.0 |
| Basic | 2.0 |
| Below Basic | 1.0 |

The GPA measure, we believe, is a better representation of student achievement on statewide standardized exams. In this report, we are presenting a list of the top 25 schools in each area. In
some cases, these "top 25 lists" will contain more than 25 schools as some schools' GPA scores will be identical. This is not a new phenomenon, as we also exceeded 25 schools in previous reports when using the percent proficient and advanced metric as an indicator for student achievement; however, there are fewer ties using the more precise GPA measure.

After we present our overall snapshot of high-performing schools, we will release subsequent reports every few weeks focusing on different subsets of schools. In the following weeks, we will focus on high-performing elementary schools, middle schools, and high schools in the various regions across the state. Then, we will feature schools that are beating the odds (that is, schools that have high levels of student achievement while serving a high percentage of lowincome students). Finally, we will conclude our report by focusing on the schools with the greatest improvement in test scores. Our release schedule is:

- High-Achieving "Overall" Schools in Arkansas
- High-Achieving Elementary Schools
- High-Achieving Middle Schools
- High-Achieving High Schools
- Beating the Odds: High-Achieving Schools Serving Low-Income Communities
- Most Improved Schools

Stay tuned over the next ten weeks to see which schools in your area are recognized for our OEP Awards!

## VI. 2014 OEP Awards: Most Improved Schools Between 2009 and 2014

In this set of OEP Awards, schools are awarded based on improvement on Benchmark exams at the elementary and middle school level in Mathematics and Literacy, and End-of-Course exams in Algebra, Geometry, Biology, and Grade 11 Literacy. We rank schools by greatest improvement, where our measure of improvement is simply the difference between the ending score and the starting score over this time period. We also highlight the five most improved schools in each region in each of the subject areas.

In this section, we use the GPA rating system described in the introduction. With the GPA measure, schools are given credit for the number of advanced, proficient, basic, and below basic students. ${ }^{1}$ Thanks to the availability of many years of testing data, we were able to construct a growth score that is less susceptible to the potential instability of year-to-year changes due to an abnormally high or low score in either of the two observed years. To smooth out abnormally high or low scores in one particular year, we use multi-year averages for both the beginning score and the ending score over the five year time period. The starting score is the average score from the 2008-09 and 2009-10 school years; and the ending score is the average of the two most recent school years (2012-13 and 2013-14). Due to the time span of the data, there are currently operating schools not included in this report, because these schools did not exist in the 2008-09 or 2009-10 school years.

Each table presents the most improved schools for the noted Benchmark and End-of-Course Exam. The tables include the region in which the school is located, the grades served, region, and level of poverty (Free-and-Reduced Lunch rates), in addition to two measures of academic growth over roughly the past half-decade. To demonstrate academic growth, we not only show the GPA increase used to compile the rankings, but we also show the point increase in the percent of students achieving at the proficient or advanced levels over that same time period. On the Office for Education Policy website, you can access the complete growth database: http://www.officeforeducationpolicy.org/arkansas-schools-data/. This database is especially helpful because it lists each school's annual End-of-Course Exam results since the 2008-09 academic year. Schools can be compared by Free-and-Reduced Lunch (FRL) status or by region. We recommend you examine the database and see the growth that Arkansas' schools have made.

## FF. Algebra End-of-Course Exam

Algebra is generally taken during the ninth grade; however, some students may elect to take this course earlier if they have taken prerequisite classes. Thus, the most advanced students take the course and the test in the $7^{\text {th }}$ or $8^{\text {th }}$ grade. Because of the likely academic differences between students who take algebra in the 8th and 9th grades, middle and junior high schools tend to have higher proficiency levels than do schools which serve $9^{\text {th }}$ grade students. Due to these differences, these awards are split into three categories:

- High School (schools that serve $9^{\text {th }}$ grade and above)
- Junior High and Comprehensive High School (schools that serve $8^{\text {th }}$ and $9^{\text {th }}$ grade)
- Middle School (schools that serve $8^{\text {th }}$ grade and below)

## GG. Geometry End-of-Course Exam

Geometry is generally taken during the tenth grade; however, some students may elect to take the course earlier if they have taken prerequisite classes. This typically results in the most advanced students taking the exam in $8^{\text {th }}$ or $9^{\text {th }}$ grade. Because of the likely academic differences between students who take geometry in earlier grades, junior high schools tend to have higher proficiency levels than do schools which serve only $10^{\text {th }}$ grade students. For this reason, schools have been split into two groups:

- High School: primarily $9^{\text {th }}-12^{\text {th }}$ grades (includes Comprehensive High Schools serving $7^{\text {th }}-12^{\text {th }}$ grades)
- Junior High School: primarily $8^{\text {th }}-9^{\text {th }}$ grades (and/or any grades below)

For the purposes of this report, all schools were considered for the awards by region.

## HH. Biology End-of-Course Exam

Biology is generally taken during the tenth grade; however, some students may elect to take the course earlier if they have taken prerequisite classes. This typically results in the most advanced students taking the exam in $8^{\text {th }}$ or $9^{\text {th }}$ grade. Because of the likely academic differences between students who take biology in earlier grades, junior high schools tend to have higher proficiency levels than do schools which serve only $10^{\text {th }}$ grade students. For this reason, schools have been split into two groups:

- High School: primarily $9^{\text {th }}-12^{\text {th }}$ grades (includes Comprehensive High Schools serving $7^{\text {th }}-12^{\text {th }}$ grades)
- Junior High School: primarily $8^{\text {th }}-9^{\text {th }}$ grades (and/or any grades below)

For the purposes of this report, all schools were included for the awards by region.
The Biology EOC was first administered in the 2008-09 school year, and so for the purposes of this report, growth is measured from a baseline average of the 2008-09 and 2009-10 school years to an outcome average of the 2012-13 and 2013-14 school years.

## Appendix

## A. Methods

The Office for Education Policy strives to make all of our calculations and publications transparent to our readers. Thus, in this appendix we describe our data source, calculations performed on these data for the purposes of our reporting, and our method for determining a school's classification as an elementary, middle, or high school.

All data used in this report were obtained from the Arkansas Department of Education. Benchmark and End-of-Course exam scores were obtained from the testing section (http://www.arkansased.org/divisions/learning-services/student-assessment). Other data, such as the percent of students eligible for free and reduced lunch, were obtained from the Arkansas Department of Education Data Center (http://adedata.arkansas.gov).

All data were analyzed at the school level; however, the ADE provides the percentage of scores at the proficient and advanced level by grade. Therefore, in order to present an accurate school level percentage of students scoring proficient and advanced across all grades, a weighted average for each school was calculated to account for different levels of enrollment at each grade level. In an effort to highlight schools that were strong in both subject areas, we calculated a simple average of the school level percent proficient and advanced in math and literacy at the elementary and middle school levels.

As previously discussed in the introduction, in order to calculate the GPA measure we treat the benchmark test scores similar to the existing grade point system.

| Category | GPA Points <br> Awarded |
| :--- | :---: |
| Advanced | 4.0 |
| Proficient | 3.0 |
| Basic | 2.0 |
| Below Basic | 1.0 |

We calculated the GPA measure for every schools math, literacy, and combined math and literacy scores. The GPA measure is comprehensive in that it takes into account all of the test score levels (advanced, proficient, basic, and below basic), instead of lumping together advanced and proficient scores.

## B. School Classification

For the OEP Awards, we classified schools based on the following rules:

- Elementary School: primarily grades 3-5 (minimum grade P, K, 1, 2, 3, or 4)
- Middle School: primarily grades 6-8 (minimum grade of 4,5 , or 6 and maximum grade of 7,8 , or 9 )

There were also a few "comprehensive schools," such as K-8 or K-12 schools, that we included as either middle schools or elementary schools based on their enrollment numbers. The following table lists every grade configuration and their classifications.

Table A: School Classifications

| Elementary Schools | Middle Schools |
| :---: | :---: |
| 1-4 | 4-6 |
| 1-5 | 4-8 |
| 1-6 | 5-6 |
| 1-8 | 5-7 |
| 2-3 | 5-8 |
| 2-4 | 5-9 |
| 2-5 | 5-12 |
| 2-6 | 6 |
| 3-4 | 6-12 |
| 3-5 | 6-7 |
| 3-6 | 6-8 |
| 4-5 | 7-12 |
| 5 | 7-8 |
| K-3 | 7-9 |
| K-4 | 8 |
| K-5 | 8-9 |
| K-6 | K-12 |
| K-7 | 8-12 |
| K-8 |  |
| P-2 |  |
| P-3 |  |
| P-4 |  |
| P-5 |  |
| P-6 |  |
| P-7 |  |
| P-8 |  |

## C. School Classification - High School Awards

For the OEP High School Awards, we primarily classified schools based on the following rules:

- Junior High: primarily grades 7 - 9 (maximum grade of 9 )
- High School: primarily grades 9 - 12

For the Algebra EOC, schools are classified differently, as the test is taken at different levels. These classifications are explained in the Algebra EOC section.

Table B: School Classifications

| Junior High |  |
| :---: | :---: |
| $5-7$ | High School |
| $5-8$ | $8-12$ |
| $6-7$ |  |
| $6-8$ | $10-12$ |
| $7-8$ |  |
| $7-9$ |  |
| 8 |  |
| $8-9$ |  |
| $4-8$ | $7-12$ |
| $1-8$ | -12 |
| K-8 |  |

[^0]:    ${ }^{1}$ The GPA rating is a score derived from an average where, an advanced score is counted as a 4.0 like an "A", proficient score as a 3.0 , like a "B", basic score as a 2.0 , like a " C ", and below basic as a 1.0 , like a grade of " D ".

[^1]:    ${ }^{2}$ Free-and-reduced lunch rates from the 2013-14 school year
    ${ }^{3}$ Initial Proficient/Advanced \% is an average of the 2008-09 and 2009-10 school years. End Proficient/Advanced \% is an average of the 2012-13 and 2013-14 school years.
    ${ }^{4}$ Initial GPA is an average of the 2008-09 and 2009-10 school years. End GPA is an average of the 2012-13 and 2013-14 school years.
    ${ }^{5}$ Due to rounding of numbers, there may be slight differences between the overall growth GPA and the GPA Initial $\rightarrow$ End column. Refer to the OEP growth database for exact numbers.

[^2]:    ${ }^{6}$ A school was designated High School if it served students in the $9{ }^{\text {th }}$ grade and did not serve $8^{\text {th }}$ grade students.
    ${ }^{7}$ Free-and-reduced lunch rates from the 2013-14 school year
    ${ }^{8}$ Initial Proficient/Advanced $\%$ is an average of the 2008-09 and 2009-10 school years. End Proficient/Advanced \% is an average of the 2012-13 and 2013-14 school years.
    ${ }^{9}$ Initial GPA is an average of the 2008-09 and 2009-10 school years. End GPA is an average of the 2012-13 and 2013-14 school years.
    ${ }^{10}$ Due to rounding of numbers, there may be slight differences between the overall growth GPA and the GPA Initial $\rightarrow$ End column. Refer to the OEP growth database for exact numbers.

[^3]:    ${ }^{11}$ A school was designated a Junior High School or Comprehensive High School if it serves students in $8^{\text {th }}$ and $9^{\text {th }}$ grades.

[^4]:    ${ }^{12}$ A school was designated $8^{\text {th }}$ Grade Middle School if it served students in grades 8 (and/or any grades below).

[^5]:    ${ }^{13}$ A school was designated High School if it primarily serves students in grades $9-12$.
    ${ }^{14}$ Initial Proficient/Advanced $\%$ is an average of the 2008-09 and 2009-10 school years. End Proficient/Advanced $\%$ is an average of the 2012-13 and 2013-14 school years.
    ${ }^{15}$ Initial GPA is an average of the 2008-09 and 2009-10 school years. End GPA is an average of the 2012-13 and 2013-14 school years.

[^6]:    ${ }^{16}$ A school was designated a Junior High School if it serves students in grades primarily 7-8 (maximum grade of 9).

[^7]:    ${ }^{17}$ For the purposes of this award, schools of any grade level configuration are included, as there are very few junior highs that offered EOC Biology throughout this time span.
    ${ }^{18}$ Initial Proficient/Advanced $\%$ is an average of the 2008-09 and 2009-10 school years, because the first Biology Exam was administered in 2008-09. End Proficient/Advanced \% is an average of the 2012-13 and 2013-14 school years.
    ${ }^{19}$ Initial GPA is an average of the 2008-09 and 2009-10 school years. End GPA is an average of the 2012-13 and 2013-14 school years.

[^8]:    ${ }^{20}$ Initial Proficient/Advanced $\%$ is an average of the 2008-09 and 2009-10 school years. End Proficient/Advanced $\%$ is an average of the 2012-13 and 2013-14 school years.
    ${ }^{21}$ Initial GPA is an average of the 2008-09 and 2009-10 school years. End GPA is an average of the 2012-13 and 2013-14 school years.
